Cameron Gale, Web Developer

Portfolio: camerongale.com

Github: github.com/CameronEldonGale

Email: cameroneldongale@gmail.com

LinkedIn: www.linkedin.com/in/cameron-gale

Technical Skills

JavaScript || HTML/CSS || JQuery || Angular || Node || Express || SQL || MongoDB || Ionic

Work History

DevMountain - Mentor (August 2016 – Present)

- Mentoring students as they learn JavaScript, Html, CSS, Angular, Node, PostgreSQL, and other technologies
- Acted as Project Manager for two groups
- Preparing and leading workshops in JavaScript, HTML/CSS, and more
  - ex: https://github.com/CameronEldonGale/workshop-caurosel

KarSync - Web Developer Intern(August 2016 – October 2016)

- Contribute to KarSync's code base using Mongo, Express, Angular, and Node
- Mentor less experienced interns
- Had more commits than anyone else

Project Experience

KarSync
URL: karsync.ninja

A project where I got to work with a group for a local start up. They want to put on board diagnostic readers in cars, and create applications around those. We were asked to make the web portal for a mechanic to see all the data coming from his clients. KarSync was already using MySQL, so I had the opportunity to learn it. I was responsible for the Dashboard, Maintenance view, and the back-end.

Space Trader
URL: spacetrader.ninja

My first attempt at remaking Space Trader. Space Trader was a text based RPG for the palm pilot. It's official site is www.spronck.net/spacetrader. This was my first full stack app. I wanted to recreate the feel of playing it on my palm pilot. So I used Ionic, a framework that lets you turn your web apps into mobile apps.

Education

DevMountain Web Development Boot Camp (2016)
AA, Utah Valley University (2008)
